USB-C To 4-Port Hub With PD Charging

Customizable USB-C Multiport Hub - Power input port

Expand one USB-C port into four USB-A ports with data transfer speeds up to 5Gbps. One USB-A port supports BC1.2 charging, while a dedicated USB-C PD input supports power pass-through to the host. The compact hub supports both bus-powered and self-powered operation.

Features

- **Four USB-A Ports** Expand one USB-C port into four USB-A ports.
- **Up to 5Gbps** Transfer data at speeds up to 5Gbps.
- **USB-C PD Pass-Through** Power the host through the dedicated USB-C PD input.
- **BC1.2 Charging** One USB-A port supports BC1.2 charging for compatible devices.
- **Dual Power Modes** Supports both bus-powered and self-powered operation.
- **Compact Design** A slim, lightweight design for easy portability.

Specifications

Model	HUC1050
Host / Upstream	
Upstream Port (Host)	USB-C (male)
Host Interface	USB-C
USB	
USB Downstream	3 × USB-A 5Gbps, 1 × USB-A 5Gbps (with BC1.2 charging)
Power	
Power Mode	Dual-Power
PD Power Input	1 × USB-C PD input, power pass-through to host
Physical	
Dimension (L x W x H)	92 x 38.7 x 12 mm
Operating Temperature	0～40°C
General	
Storage Temperature	-20～70°C
